WHEN ORDERING MUM CUTTINGS

Please indicate the earliest date delivery will be acceptable and the maximum number of cuttings that can be handled in a single shipment.

To serve you best, it is necessary that we have your order at least a month in advance of requested delivery date, although often it is possible to make shipment on short notice.

Where we are unable to ship very close to the requested delivery date we will advise you of our growers best estimate of delivery. We suggest you advise whether substitutions will be acceptable when giving the order.

TERMS OF SALE

ON CHRYSANTHEMUM VARIETIES LISTED IN THIS CATALOGUE

The minimum total order that can be accepted is 500 rooted cuttings. Fifty rooted cuttings of a variety is the minimum that can be supplied. More than 50 of a variety must be in multiples of 50.

The minimum number of a variety that can be supplied in unrooted cuttings is 250.

Quantity discounts will be discontinued.

No quantity discounts will be allowed regardless of size of order.

We recommend shipment by Air Freight wherever possible. Air Freight is prepared to serve customers who are close to an airport by phoning them when a shipment arrives and reconsigning shipments via Railway Express to customers who are too far away to pick up shipments at the airport.

Where shipments are not ordered Air Freight they will be sent Railway Express.

CHRYSANTHEMUMS EVERY MONTH

Fundamentals of successful Chrysanthemum culture will probably always remain the same, except, as more progress is made probably we will see more gravel culture. Black Cloth shading for early flowers has become standard practice and as cotton goods become more readily available, we will see even more. Recent experiments by Dr. Kenneth Post at Cornell University have shown it is possible to produce cut Chrysanthemums of good quality at any time during the year by the use of lights and shading. Three crops can be produced in the same bench each year, timed exactly as wanted.

Best varieties for winter flowering were Seafoam, Sunnyside, Omega, Valencia, Golden Jane and Riviera. As further experiments are continued other varieties will be found most suitable for various seasons. We would suggest growers interested in this new development contact your State experiment station. Our propagators are arranging to have cuttings available throughout the entire year for those who wish to follow this program.

DISCLAIMER

1. We make no warranty, expressed or implied, as to kind, description, quality or productiveness of any stock and we will not be responsible for crop.
2. We will not be responsible for any errors or omissions and in no event shall our liability for any claim of loss or damage due to any cause whatsoever be greater than the invoice value of the merchandise. This order, if accepted, is subject to pro-rata delivery if conditions in our sole judgment justify it, either on account of short crop, prior sale or for any other reason. We will not be responsible for delays, damages or loss in transit. Our liability ceases upon delivery to the common carrier. All orders subject to acceptance by home office.

CAROLINE YOSICK

(Shelby Floral)

A small, decorative, lavender pink pompon that flowers naturally October 20. Caroline Yosick gives a sharp and uniform response to black cloth shade and its major value is for August and September flowering. It complements and completes an important trio for early shading—Caroline Yosick, Pinocchio, and Gold Coast. It has a very dependable growth habit, does not crown like Jewell, and has a much more rigid stem than Jessie and Pink Dot. The small, decorative flower of Caroline Yosick possesses excellent color-holding quality, and is very satisfactory under even the earliest shadings. Its color is not outstanding in natural daylight but brightens or softens remarkably under artificial lights. We suggest that you wait to evaluate this variety until the reports from the wholesalers are received. Price \$90.00

GOLD COAST

(Baur-Steinkamp)

A small deep lemon yellow pompon blooming normally October 25. It lends itself ideally to early shadings. Its clean, vigorous free growth habit is outstanding. In growth habit and production, it is very similar to Pinocchio. It complements and completes an important trio for early shading . . . Gold Coast, Pinocchio and Caroline Yosick. The flower is small and firm; the color is intense. Easily grown and consistently dependable—a top notch cloth house variety. We recommend Gold Coast as the best yellow pompon for early shading. Price \$70.00

LAKME

(Depetris)

A glistening small white pompon that matures normally November 12. It possesses a hard, durable, formal flower that easily satisfies the most critical demands for keeping and shipping quality. Its trim, smart appearance is enhanced by a chartreuse eye. The habit of growth is free, wiry and the dark, rigid stems develop a very productive compound spray. In growth habit and cultural requirements it very closely resembles the variety Cassandra. Its black cloth response is rapid and just nicely follows Pinocchio in the shading program. It lends itself well to out-of-season flowering and has been outstanding in the Cornell trials. High, uniform production and the height of quality in its floral make-up assure Lakme a position of eminence in any list of early profitable white pompons. Price \$90.00.

OMEGA

(Yoder Bros.)

A deep lemon yellow pompon maturing December 10, just nicely following Sunnyside. Omega combines an exceptionally strong, vigorous habit and beautiful dark, glossy foliage with a rigid, wiry spray. The formal flower possesses unusual substance and keeping quality. No blindness has ever been apparent and tests indicate a very high degree of resistance to Verticillium. Omega in its natural season complements Sunnyside by extending the season of top quality yellow pompons. It is equally valuable on raised benches or ground beds. On the latter with late planting and lights it is easily had for Christmas. It has been successfully lighted into February flowering. Unhesitatingly we recommend Omega as the best pompon to follow Sunnyside. Price \$90.00.

DARK PINK ORCHID QUEEN

(Delworth)

An intense mauve pink sport from Orchid Queen with the added attributes of increased vigor in both plant and flower. The importance of its value over its parent for early shading has been proven by extensive tests. The color is much deeper. The flower is larger and more fully rounded. The foliage, stem and height of the plant are larger and stronger than the original. Dark Pink Orchid Queen should rapidly take a prominent position in the list of good standards. Price \$90.00.

RED RUST

(Depetris)

An exquisitely colored, well rounded, large pompon blooming November 5, The color is a beautiful blend of orange, red and chrome bronze similar to Natoma. The habit of growth is clean, uniform, and vigorous with excellent foliage and well branched sprays. The scintillating color is an epoch in chrysanthemum breeding but it is sensitive to intense light and is, therefore, best adapted to later greenhouse shadings and natural flowering. It possesses greater vigor and is easier to grow than Natoma. The production excels that of Navaho. In its natural season Red Rust should become a very important variety in creating greater consumer appeal and stimulating interest in intrinsically vivid and useful colors. Price \$90.00.

SUNKIST

(Yoder Bros.)

An intense golden yellow single that flowers normally with Vibrant December 20, for the Christmas season.

The variety lends itself to wide variations in culture and dependably produces a profitable crop. Like Vibrant, Yukon, and Rosalind it is well suited to late planting and ground bed culture. In preliminary trials it has responded very satisfactorily when lighted for delayed flowering. Easily grown and readily sold, Sunkist fills a real demand for Golden Christmas daisies. Price \$90.00.

DEBONAIR

(Yoder Bros.)

A rich crimson red decorative pompon that blooms normally December 5. The beauty and symmetry of its form combined with the velvety gloss of its rich and intense color has never failed to create enthusiastic comment. Shaded to flower for the 1945 National Chrysanthemum show in Cleveland it took top honors in seedling competition. Moderate temperatures, optimum light intensity and other environmental conditions which promote a firm wood and gradual elongation of stem and spray best suit this variety. Debonair can be lighted for the Christmas Season. The growth is vigorous, and healthy and because of the strong consumer demand for this color, it commands premium prices. Price \$90.00.

BROCADE

(Yoder Bros.)

A lively cameo pink daisy that blooms naturally with Masterpiece November 15. The variety is of extremely easy culture. Its free, vigorous growth makes for top production. It is medium to tall in height, and the strong stems develop big, well branched sprays. The response of Brocade to shading is similar to that of Masterpiece and should be grouped with that variety in the shading program. Brocade is the pink daisy to complement Masterpiece in later shadings and natural flowering. For a mid-season pink single to fill the gap between the early pink singles, Oct. Pink and W.H. Buckingham, and the later variety, Valencia, we suggest Brocade. Price \$90.00.

PRICE LIST

LARGE FLOWERING

Please note carefully instructions and terms of sale on inside front cover.

Order not less than 50 of a variety and in multiples of fifty. Your total order must be not less than 500 rooted cuttings.

Price of unrooted cuttings will be \$27.50 per 1000 on all standard priced (\$40.00) varieties and \$12.50 less than the rooted price on all premium priced varieties.

PATENT NO. 1,941,055

TO=NA=CIDE

is now packed for the retail trade
in 5 lb. bags.

Retail Price: 5 lbs. — \$1.50

1 lb. will cover 60 square feet — 5 lbs. will cover 300 square feet

TO-NA-CIDE is a valuable and well established insecticide, used for many years by growers in Greenhouses and Gardens for Gladiolus, Flowers, and Vegetables grown for the commercial market.

TO-NA-CIDE is used as a control for Thrips, Sow Bugs, Cut Worms, Slugs, Bean Beetle and many other insect pests.

TO-NA-CIDE is a powder which is very easy to apply. Just spread a little around the plants to cover the ground lightly and water it moderately. If plants or vegetables are planted in rows, spread a little TO-NA-CIDE on each side of the rows, about one or two inches away from the plants.

For Pot Plants or Plants in tubs or window boxes, apply a little on top of soil. You will then have less trouble with insects.

TO-NA-CIDE can be used every two or three weeks, if necessary. In case of heavy rains which will in all probability wash away the effectiveness of TO-NA-CIDE, it is advisable to repeat the procedure.

TO-NA-CIDE should never be used on the plants or foliage. Always apply it on the soil around the plants.

Don't use TO-NA-CIDE on a windy day as the powder will blow away. Always apply it on a calm day.

For the past 14 years TO-NA-CIDE was sold exclusively to the Commercial Trade. Its usefulness has been proven by the constant repeat orders and unsolicited testimonials.
